

Report Description

TITLE:	Dispatch Security Constraints
CONFIDENTIALITY:	Public
PURPOSE:	This report provides a list of binding security constraints ¹ determined by the real-time calculation engine, for each five-minute dispatch interval of the reporting hour.
FREQUENCY:	Hourly following the successful completion of the RT calculation engine for all dispatch intervals in the previous hour
GRANULARITY:	Five-minute

¹ This footnote to not be included in the actual Help File:
This report content to stay as is although report contains both binding and active constraints. This is a LOB issue and will be resolved outside MRP. Once issue is assessed and a solution has been developed, it can be updated later on but as of now under MRP – report is only going through a timing update
