

Realtime 5-min Ontario Zonal Energy Price Report

Help File

Purpose of the Realtime 5-min Ontario Zonal Energy Price Report

The Realtime 5-min Ontario Zonal Energy Price Report contains the 5-minute Ontario Zonal Price for energy and its components after the successful run and execution of the real-time calculation engine. This report provides the real-time Ontario Zonal Price for energy and its components for each 5-minute interval of the current dispatch hour.

Confidentiality Classification

Public

Frequency

Every 5 minutes

Granularity

Every 5-minutes for the Ontario Zone

Description of the Realtime 5-min Ontario Zonal Energy Price Report Fields

Report Field Title	Definition of Report Field Title
Created at	This field indicates the date and time that the report was created. It will be displayed as mmm dd, yyyy hh(24):mm:ss.
For (Valid Dispatch Date)	This field will indicate the date and hour for which this data applies. It will be displayed as mmm dd, yyyy – Hour 1-24.

Report Field Title	Definition of Report Field Title
Ontario Zonal Price & Components	<p>This field indicates the Ontario Zonal Price and its components:</p> <ul style="list-style-type: none"> • Zonal Price • Energy Loss Price • Energy Congestion Price
Real-time Zonal Energy Price (\$/MWh) for interval	<p>This field indicates the zonal price and its components for the indicated interval for energy at the Ontario Zone level.</p>
Zonal Price	<p>Zonal Price (Capped) = Energy Reference Price at Reference Location + Energy Loss Price + Energy Congestion Price</p> <p>Ontario zonal energy price for an hour will be calculated as the sum of the hourly reference price, the load distribution-weighted loss component within the zone, and the load distribution-weighted congestion component within the zone.</p>
Energy Loss Price	<p>The Energy Loss Price (Capped) reflects the cost of transmission losses at a given location relative to the Reference Location. It is calculated by multiplying the Marginal Loss Factor by the Energy Reference Price.</p> <p>The Marginal Loss Factor is derived from the transmission losses incurred from meeting one additional MW of load at the location with one additional MW of supply from the Reference Location.</p>
Energy Congestion Price	<p>The Energy Congestion Price (Capped) is the change in incremental cost at any location on the grid, due to transmission congestion between that location and the Reference Location.</p>
Interval	<p>This field indicates the interval for which the data is applicable. These are the 12 5-minute intervals of the hour.</p>

Important Items to note when reading Realtime 5-min Ontario Zonal Energy Price Report

A value shown in **red** indicates the value is administered either due to a tools problem in real-time or through ex-post administrative pricing.
